From the very first day of the war until today, the Russian occupiers have been destroying what the university has been building for decades or even hundreds of years.

According to Kremlin leaders, Russia is not firing the cities, but only the strategic military sites, and everything else is just anti-Russian propaganda. The photo below shows evidence that everything they say is an outright lie.

They may be able to destroy the main and northern buildings, which are the heart and business card of Kharkiv, to destroy the educational building on Myronosytska Street with missiles, where future leading economists and businessmen of Ukraine study, to bomb the Institute of Physics and Technology, which trains nuclear specialists and medical physics, the scientific library, which was founded the same time the university was, in 1804 and preserves unique books, and Karazin's dormitories, which become the home of our students every year.

But they do not understand that our power, our strength, our dream cannot be destroyed.

Destroying buildings cannot destroy our centuries-old history. It was, is and always will be ours.

Karazinsky is about how each of us feels, what we keep inside: values, relationships, knowledge, emotions, memories.

And it is simply impossible to destroy it.

Victory will be ours 💙💛

Glory to Ukraine!

Від самого першого дня війни й донині російські окупанти знищують те, що університет створював протягом десятків, і навіть сотні років.

Як стверджують кремлівські очільники, росія не стріляє по містах, а тільки по стратегічних військових об'єктах, а все інше — лише антиросійська пропаганда. На фото нижче докази того, що все, що вони кажуть — відверта й підла брехня.

Можна руйнувати головний та північний корпуси, які є серцем та візитною картою Харкова, знищити сотнями ракетний корпус на вулиці Мухомовській, який користується майбутніми студентами, але не можна знищити Харків, який живе й буде жити.
