

# Ukraine: EU and UNDP open new modular administrative service centre in war-torn Voznesensk

May 24, 2024

The United Nations Development Programme (UNDP), with support from the European Union and in partnership with the Ministry of Digital Transformation of Ukraine, has constructed a new modular administrative service centre (ASC) in Voznesensk, Mykolaiv Oblast.

The new modular ASC will be a one-stop shop with 450 services needed by more than 37,000 community residents and internally displaced persons. It will operate as a Diia.Centre, a one-stop shop where you can address several issues in one visit, including administrative services, business consulting, free legal assistance, banking services, access to co-working areas and much more.

The building is also fully accessible for low-mobility population groups.

The total construction cost is \$288,500. Furniture and computer equipment for 27 workstations were also purchased. Voznesensk City Council financed the purchase of four additional building modules and a lift. In addition, the international partners also procured a software and hardware package, the 'Administrative Service Centre in a suitcase', to ensure service delivery in remote areas of the community.

*"By improving access to essential services, we are helping to strengthen the social fabric in areas that were heavily affected by the Russian war of aggression against Ukraine,"* said Stefan Schleuning, Head of Cooperation at the EU Delegation to Ukraine.
