

# EU and UNDP open new modular administrative service centre in Dymer

November 8, 2024

The United Nations Development Programme (UNDP) in Ukraine, in partnership with the European Union and the Ministry of Digital Transformation of Ukraine, has constructed and equipped a modular administrative service centre (ASC) in Dymer, Kyiv Oblast.

The building consists of modules that can be rapidly assembled, and it meets all state building standards. The centre has a permanent location and network connections, making it a long-term facility rather than a temporary solution. It is fully accessible for individuals with limited mobility.

The modular ASC will become a universal facility, providing more than 240 services for local residents and internally displaced persons. Visitors will be able to obtain a wide range of services in one visit, including administrative services, social services for internally displaced persons, building permits,

vehicle registration services and much more.

*“The new ASC is an important step in the community’s recovery after two months of occupation and significant infrastructure damage at the start of Russia’s full-scale invasion of Ukraine,”* says a press release by the EU Delegation to Ukraine.

The total cost of the project is US\$270,000. UNDP, with support from the European Union, has also purchased furniture and computer equipment for 12 workplaces in the ASC, and the Dymer community has created additional remote workplaces in Katiuzhanka, Demydiv and Lytvynivka at its own expense.
